Updating your NETID Vpn to use better login security on Windows 7 and 8:

1 – On Control Panel, open ‘Network and Sharing Center’
2 – In the left pane of the interface, click on ‘Change adapter settings’
3 – Right-click on the NETID VPN and select ‘Properties’
4 – Go to the ‘Security’ tab
5 – Change the settings to match this screen shot:

![NETID VPN Properties](image)

6 – After saving, right-click and select ‘Connect’ to test
