

Podcasting at the UW: An Evaluation of Current Use

UW Pilot Project

Introduced podcasting in large-lecture courses

Timeline

Autumn 2005: 4 courses
Winter 2006: 13 courses
Spring 2006: 20 courses

Evaluation

Surveys of students enrolled in courses using podcasts

4,419 students in 17 courses

222 respondents (5%)

Report online at <http://catalyst.washington.edu/projects>

Changes for spring 2006

Instructor survey

Expanded student survey

Improved contact procedures

What percentage of the podcast recordings did you listen to?

Podcast: "A digital recording of a radio broadcast or similar program, made available on the Internet for downloading to a personal audio player."

New Oxford American Dictionary (2005 word of the year)

"The first time you hear the story, you listen with the aim of understanding. The second time, you get the lead in, the particulars, and are more able to determine what is crucial to the problem and is an interesting aside."

Do you own an MP3 player?

"It allowed me to be more engaged during the lecture and not just furiously taking notes. If I missed something I wanted to include in my notes I could go back to the podcast and fill in what I missed."

Strengths of podcasting

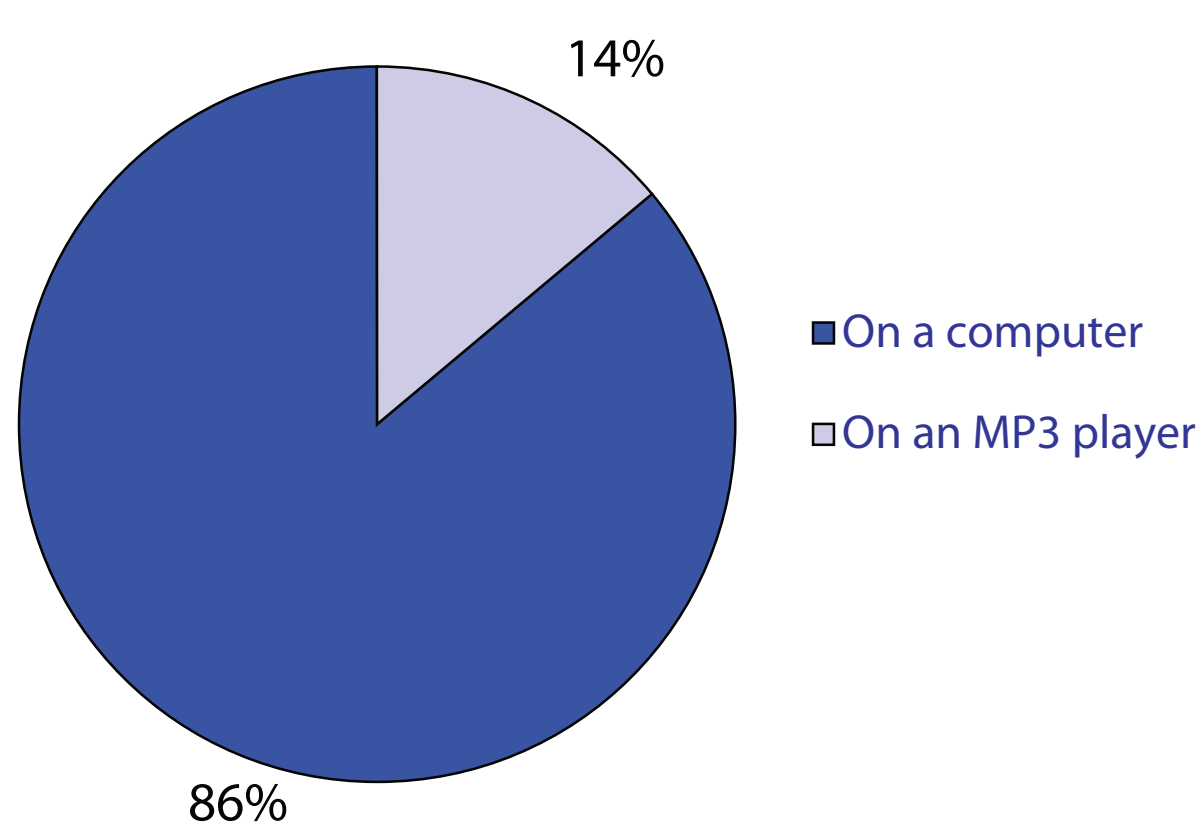

Helped students catch up when they missed a class

Helped students prepare for homework and exams

Helped students fill in gaps in their notes

Clarified concepts discussed in class

How did you listen to the course podcast?

Weaknesses of podcasting

Difficult to search for specific information within a recording

Cannot capture visual materials or class discussion

Tempted some students to skip class

Not available in enough courses

The availability of the course podcast...
