| ID     | NAME | SIZE | Size | SIZE | AFF  | CAT SE | CAT 6A | CATV | FIBER | VOICE | FAX | FACnet | DATA | DATA | CATV | (Yes) | Required | Number |          |         |

Fill out this Early Building Services Sheet. Include the MDF/IDF room number in column Q. This is in addition to showing these early services on the IDF/MDF spread sheets.
If your project does not require a particular product, hide that column in all spreadsheets. For instance, if the project is all Cat 6a cable and there is not cable TV, hide columns G, I, and N. If other cable types are used, modify existing headers or add a column if necessary.

**build Systems Outlets Grouped**

**1st Floor Standard Outlets**

If the MDF also serves as an IDF, expand this section and include any standard outlets. If not delete this section and modify the totals row at the bottom.

**IP Address Information**

See Wi-Fi naming convention: https://itconnect.washington.edu/work/uw-it-design-guide/ (A/E Guide for Design of Distributed Network Part 2.2E: Naming convention)
If your project does not require a particular product, hide that column in all spread sheets. For instance if the project is all Cat 6a cable and there is not cable TV, hide columns G, I and N. If other cable types are used modify existing headers or add a column if necessary.

Xnd Floor going to IDF (Room Number)

If the IDF serves multiple floors copy the groupings from above here modify and add the information for the line items. If not delete the header above.

Create copies of this sheet (a new tab in this work book) and rename as required to cover all the Communication Closets and Floors for this project.

See Data naming convention; https://itconnect.uw.edu/work/uw-it-design-guide/ (Labeling, drawing, Labeling Scheme for Room Outlets)
